### Average annual results for 2026 year to date

**Note for reading these tables:** These results show the average of all hourly results reported during the year. Each result therefore represents an average over an extended period of time. The results track our performance towards meeting our Environmental Authority (EA) limit of an average annual rate of 57 micrograms per cubic metre of air ( $\mu\text{g}/\text{m}^3$ ).

| Sulphur dioxide monitor location | Year to date                               |
|----------------------------------|--|
|                                  | 12/04/2026<br>( $\mu\text{g}/\text{m}^3$ ) |
| Wau Street                       | 10.0                                       |
| Sunset State School              | 4.9  |
| Corella Street                   | 6.5  |
| Healy State School               | 9.8  |
| Suter Road                       | 8.2  |
| RSL                              | 12.8                                       |
| Zena Street                      | 9.2  |
| Police Reserve <sup>1</sup>      |  |
| Spinifex State School            | 14.1                                       |
| Parkside Flats                   | 15.6                                       |
| Mary Street                      | 9.3  |
| May Downs                        | 20.0                                       |
| Nineteenth Avenue                | 13.3                                       |

### Performance measures index (yearly average)\*

| Sulfur dioxide concentration ( $\mu\text{g}/\text{m}^3$ ) |
|---|
| 0 – 18.8  |
| 18.8 - 37.6   |
| 37.6 – 56.4   |
| 56.4 – 85.5   |
| More than 85.5  |

\*Rounded to one decimal.
